

# CDC Admits There is No Proof COVID-19 is Airborne Virus and They Have Been Misleading the Public All Along

The so-called “experts” have failed us.

Sep 25, 2020 By [Shane Trejo](#)

[take our poll](#) - story continues below

The Centers for Disease Control and Prevention (CDC) [has admitted](#) that the organization has deceived the public throughout the entire coronavirus pandemic, backtracking on their claim that COVID-19 is an airborne virus. “CDC is currently updating its recommendations regarding airborne transmission of SARS-CoV-2,” the CDC explained in a note published earlier this week. “This was an **error** on the part of our agency and I apologize on behalf of the CDC,” said John Brooks, chief medical officer for the CDC’s COVID-19 Emergency Response, while on a call with medical professionals on Monday.

The [updated guidelines](#) note that the COVID-19 “virus is thought to spread mainly from person-to-person.” “It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes. This is not thought to be the main way the virus spreads, but we are still learning more about how this virus spreads,” the new guidelines state, with the CDC parsing their words carefully to note there is no concrete evidence behind their assertion.

This is far from the first time that the CDC has admitted misleading the public about COVID-19 to stoke mass hysteria among the public, [as Big League Politics has noted](#):

168,864. According to the CDC, that’s the number of “COVID-19-related deaths” in the United States as of August 31. Of course, on the surface, nearly 170,000 deaths — especially with three months left in 2020 — is frightening to say the least. But, as usual, the devil is in the details. You see, of the 168,864 reported deaths, only 6% of them had COVID-19 listed as the ONLY cause of death. The

other 94% had, on average, 2.6 additional causes listed — per death. [“For 6% of the deaths, COVID-19 was the only cause mentioned.”](#) For deaths with conditions or causes in addition to COVID-19, on average, there were 2.6 additional conditions or causes per death.” – CDC Website In short, according to official data from the CDC, roughly 10,000 of the 168,864 “COVID-19 related deaths” can be attributed to COVID-19 alone.

10,000 — less than the average number of flu deaths per year in the United States. So why are politicians — along with their pals in the fake news media — calling for more economy-destroying lockdowns and closings? Is it really about protecting Americans from COVID-19. . . Or is it more about trying to effect the outcome of the November 3 General Election?

The scientific and medical experts have failed the public consistently during the COVID-19 scandemic. The cause may go further than mere incompetence, with these experts likely exploiting the crisis to push their preferred technocratic political agenda of totalitarian globalism.
