

CARMA Members;

I would like to share with you a discussion I've been having with voters at the doors, and it's the issue of Occupational Licensing reform. This affects numerous families moving to Virginia, especially our military families. You may be asking, what exactly is occupational licensing reform? Occupational licenses are needed for all kinds of jobs, from cosmetology to real estate, and barbers to nurses. Right now, Virginia makes incoming families pay hundreds in fees after they've already paid in previous states, and wait to get relicensed in this state! This is unfair, if you move your license should come with you and you should be able to work immediately. **I WANT TO CHANGE THIS, work to reform it, and eventually end this licensing.**

As your delegate I will work with any member to end this practice that hurts families, active duty military and small businesses. These reforms are common sense and benefit our state. You don't lose your skills by moving over state lines.

Common sense reforms such as this could make a big difference in our district; help send me to Richmond so I can fight for policies like these that truly make a difference for our families.

Together we can get things done for the 93rd district in Richmond.

Thank you,

Heather Cordasco
Candidate for Delegate
