The National Archives and Records Administration (NARA) has acknowledged possessing more than 5,000 emails and electronic records associated with the use of multiple aliases by then-Vice President Joe Biden.

The Republican-led House Oversight Committee recently demanded the release of unredacted materials related to Biden's pseudonyms that overlap with Hunter Biden's tenure on the board of Ukrainian energy company Burisma. According to Oversight Committee Chair James Comer (R-Ky.), the digital collection provides further evidence of Biden's corruption and involvement in his son's business ventures.

The New York Post has more:

NARA confirmed the existence of the trove in response to a June, 2022 Freedom of Information Act request by the Southeastern Legal Foundation, a nonprofit constitutional legal group.

The request covered emails sent by Biden to Hunter under three different aliases: “Robin Ware,” “Robert L. Peters” and “JRB Ware.”

The Southeastern Legal Foundation on Monday filed suit against NARA for the release of the records, which the group claims may show that Biden forwarded government information and discussed government business with his son Hunter Biden and others.

The group accuses NARA of having “dragged its feet” since the June 2022 FOIA request and says that not a single email has been produced since the government agency acknowledged their existence just days after the request.

“We have performed a search of our collection for Vice Presidential records related to your [June 9, 2022] request and have identified approximately 5,138 email messages, 25 electronic files and 200 pages of potentially responsive records that must be processed in order to respond to your request,” Stephannie Oriabure, the director of NARA's archival operations division, wrote to the Southeastern Legal Foundation on June 24, 2022, Monday's lawsuit revealed.

Earlier this month, Chairman Comer stated, “Joe Biden has stated there was ‘an absolute wall’ between his family's foreign business schemes and his duties as vice president, but evidence reveals that access was wide open for his family's influence peddling.”
